REMARKS

The Quayle Action mailed July 27, 2009, has been carefully reviewed and Applicants note with appreciation the identification of allowed subject matter. Specifically, claims 1-10 and 12-14 are allowed.

The Examiner raised formal matters to be addressed, specifically, amendment of the specification to provide antecedent basis for the terminology used in the claims.

By this Amendment, Applicants have amended the specification to include the terminology noted by the Examiner, including (1) receiving bag bottom portion 22, now stated at least on page 13; (2) first coupling *component*, rather than means (throughout); (3) second coupling *component*, rather than means (throughout); and (4) compacted condition, now stated at least on pages 13 and 14.

Applicants have also provided a replacement drawing sheet to which reference numeral "22" has been added to designate the receiving bag bottom portion.

With these amendments and the foregoing remarks, it is respectfully submitted that the present application is in condition for allowance.
